JTB Business Travel Solutions, Inc.

JTB Business Travel Solutions, Inc. Launches Data Integration with "TRUST CLUB Corporate Card" on its Expense Data Integration Platform "Bizvance JTB Data Connect"

JTB Business Travel Solutions, Inc. (headquartered in Koto-ku, Tokyo; President & CEO: Masahiro Harada; hereinafter referred to as "JTB-CWT"), which provides the expense data integration platform "Bizvance JTB Data Connect" for the JTB Group, will begin data integration with TRUST CLUB Corporate Card usage data, in collaboration with Sumitomo Mitsui Trust Club Co., Ltd. (headquartered in Chuo-ku, Tokyo; President & CEO: Koji Igarashi; hereinafter referred to as "Sumitomo Mitsui Trust Club").

The "Bizvance JTB Data Connect" card data integration service aggregates usage detail data from corporate cards (including purchasing cards, prepaid cards, and virtual cards) issued by various card companies and links it to the client company's workflow and expense settlement systems. Card usage detail data is automatically imported, eliminating manual input for expense processing and improving the efficiency of travel and expense settlement operations. Furthermore, "Bizvance JTB Data Connect" relays data from each card company and links it through a general-purpose interface, allowing client companies to easily implement corporate card data integration.

 TRUST CLUBカード

JTB-CWT has been integrating data with "Diners Club Corporate Card" issued by Sumitomo Mitsui Trust Club since 2015. With this new initiative, data integration with "TRUST CLUB Corporate Card (Mastercard)" is also now possible. Companies implementing "Bizvance JTB Data Connect" and its affiliated services will be able to check usage detail data for both Diners Club and TRUST CLUB corporate cards within their workflow and expense settlement systems by applying for the service.

Additionally, with "Bizvance JTB Expense" (cloud-based expense settlement system) provided by JTB-CWT, usage detail data for both Diners Club and TRUST CLUB corporate cards can be retained without alteration or modification. By utilizing corporate card data for expense settlement, and enabling reconciliation of corporate card usage details with settlement data from a search screen, further efficiency in expense settlement operations can

be achieved.

【Features of the Service】

1) Reduced input and checking tasks for travel and expense reports

By importing usage detail data for expenses paid with corporate cards into workflow and expense settlement systems, input time for expense processing is reduced, and the burden on approvers for checking is alleviated. Usage detail data can be linked to workflow and expense settlement systems as early as two days after use, enabling expense settlement. (The timing of usage detail data linkage may vary depending on the corporate card and the merchant used.) Furthermore, by using "Bizvance JT B Data Connect" in conjunction with its "Business Travel Arrangement Service," a wide range of expenses, from business travel expenses to general expenses, can be settled simply.

2) Unified data integration from multiple card companies

Usage detail data from multiple card companies, various payment methods, and different brands can be integrated in a common format, allowing client companies to use the service without being concerned about different data formats for each card company.

About "Bizvance JT B Data Connect"

"Bizvance JT B Data Connect" (formerly known as "J'sNAVI Jr.") is a cloud-based expense data transfer platform provided by JT B-CWT. As of March 2025, it has been implemented by over 300 companies. It relays business travel arrangement data and card usage detail data required for expense settlement. Its implementation contributes to the improvement of overall operational efficiency in expense processing by visualizing business travel and other usage expenses, preventing fraud, and reducing costs. It has been confirmed to be compatible with many workflow and expense settlement systems sold in Japan.

About "Bizvance JT B Expense "

"Bizvance JTB Expense" is an expense settlement system that can flexibly adapt to each company's internal regulations. It is equipped with business travel arrangement functions and corporate card integration functions provided by "Bizvance JTB Data Connect," enabling a seamless process from application to approval and travel arrangements. Furthermore, it can significantly improve the efficiency of expense settlement operations through features such as integration with transportation IC cards, automatic reading of evidence through smartphone app photography, automatic journaling of account items, and linkage with accounting systems. It also complies with the Electronic Books Preservation Act, contributing to the paperless processing of receipts and other documents.
