JTB Business Travel Solutions, Inc.

JTB Business Travel Solutions, Inc. Launches Data Integration Service with "VIEW Corporate Card" on Expense Data Transfer Platform "J'sNAVI Jr."

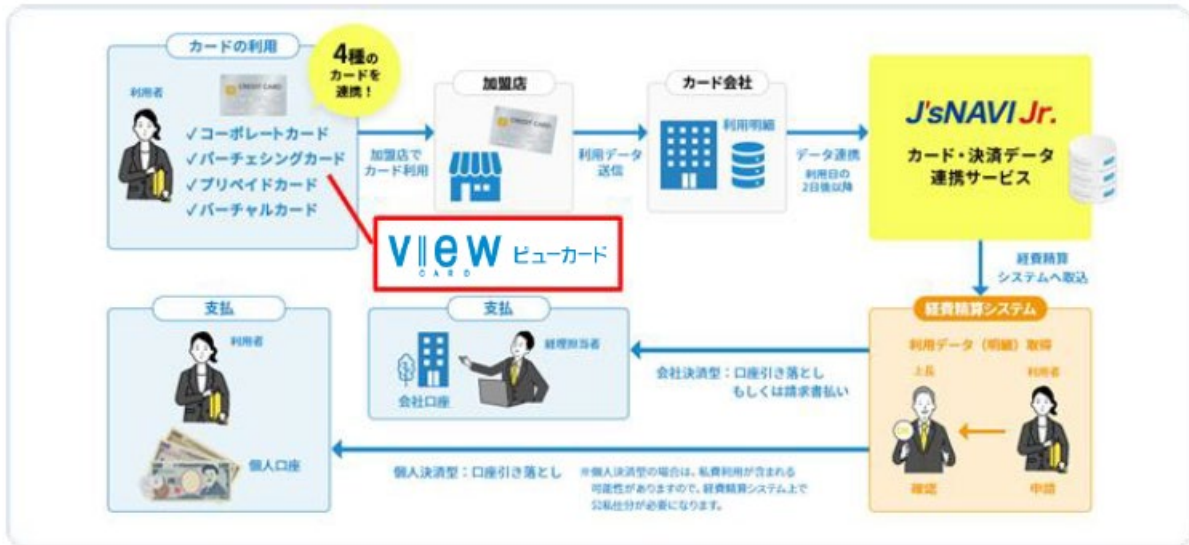

JTB Business Travel Solutions, Inc. (headquartered in Koto-ku, Tokyo; President & CEO: Masahiro Harada; hereinafter referred to as "JTB-CWT"), which provides the expense data transfer platform "J'sNAVI Jr." within the JTB Group, will begin data integration with VIEW Card Co., Ltd. (headquartered in Shinagawa-ku, Tokyo; President & CEO: Kenichiro Arai; hereinafter referred to as "VIEW Card") via UC Card Co., Ltd. (headquartered in Minato-ku, Tokyo; President & CEO: Kazunari Fukuoka; hereinafter referred to as "UC Card") for corporate card usage data.

The "J'sNAVI Jr." card data integration service aggregates usage detail data from corporate cards (including purchasing cards, prepaid cards, and virtual cards) issued by various card companies and links it to client companies' workflow and expense settlement systems. This service automates the import of card usage detail data, eliminating the need for manual data entry by users and streamlining expense processing. This significantly improves the efficiency of travel and expense settlement operations. Furthermore, "J'sNAVI Jr." acts as a hub for data from various card companies, enabling easy integration of corporate card data and other information through a general-purpose interface for client companies.

Through this partnership with VIEW Card, usage detail data from VIEW Card's VISA-branded "VIEW Corporate Card" and "VIEW Cardless Service for Corporations" (collectively referred to as "VIEW Corporate Card") can be linked via "J'sNAVI Jr." to the workflow and expense settlement systems used by client companies of these cards. Moreover, if a client uses "J'sNAVI NEO," a cloud-based expense settlement system compliant with the Electronic Books Preservation Act, the usage detail data from "VIEW Corporate Card" can be retained without alteration or modification, allowing for searching, viewing, and outputting of data after settlement processing. This further enhances the efficiency of expense settlement operations while complying with the Electronic Books Preservation Act. This service is provided via UC Card Co., Ltd. With this integration development, "J'sNAVI Jr." is now compatible with UC Card's VISA-branded corporate cards as well.

*VIEW Business Owners Card is not covered by this integration. In some cases, purchasing card usage detail data may not be covered by the integration for certain card companies. Additionally, data integration may not be

available depending on the type and brand of card contracted.

Features of the Service

1. Reduced data entry and checking operations for travel and expense reports

By importing corporate card usage detail data into workflow and expense settlement systems, the time required for settlement data entry and the burden of checking for approvers can be reduced. Usage detail data can be linked to workflow and expense settlement systems as early as two days after usage, enabling expense settlement. (*The timing of usage detail data linkage may vary depending on the corporate card merchant.) Furthermore, by using "J'sNAVI Jr." in conjunction with its "business travel arrangement services," travel and general expenses can be settled broadly and easily.

2. Integrated linkage of data from multiple card companies

Usage detail data from multiple card companies, multiple payment methods, and multiple brands can be integrated in a common format. This allows client companies to utilize the service without needing to be aware of different integration formats for each card company.

★About J'sNAVI Jr.★

"J'sNAVI Jr." is a cloud-based expense data transfer platform that relays business travel arrangement data and detailed card usage data required for expense settlement. As of October 2024, it has been implemented by over 300 companies. Its implementation contributes to the improvement of overall operational efficiency in expense processing by visualizing business travel and other usage expenses, preventing fraud, and reducing costs. It has been confirmed to be compatible with many workflow and expense settlement systems sold in Japan. *For more information, please visit the product page. (<https://bts.itbbwt.com/jsnavijr>)

★About J'sNAVI NEO★

"J'sNAVI NEO" is an expense settlement system that can flexibly adapt to each company's internal regulations. It is equipped with business travel arrangement functions and corporate card integration functions provided by J'sNAVI Jr., enabling a seamless process from application to approval and travel arrangements to expense settlement. Furthermore, it can significantly improve the efficiency of expense settlement operations through features such as integration with transportation IC cards, automatic reading of evidence through smartphone app photography, automatic journaling of account items, and linkage with accounting systems. It also complies with the Electronic Books Preservation Act, contributing to the paperless processing of receipts and other documents.

★About VIEW Corporate Card★

VIEW Corporate Card is a general term for VIEW Card's corporate cards for corporations, covering three services: "VIEW Corporate Card" for large and medium-sized enterprises, "VIEW Cardless Service for Corporations" for online payments only, and "VIEW Business Owners Card" for sole proprietors and startup business owners. As a business credit card that can be charged with Suica, it can be used for a wide range of purposes, including transportation for business trips, as well as business expenses and fixed costs.

*The card does not include Suica functionality. Auto-charge is not available.

*The VIEW Cardless Service for Corporations cannot be used to purchase or charge Suica.

★About UC Corporate Card★

UC Corporate Card is a card for large enterprises. The benefits of introducing UC Corporate Card include real-time reflection of expense usage status through cashless transactions and efficient expense settlement operations through expense management by department/position name. It also integrates automatically with various expense settlement systems, making the expense settlement process more efficient.
