JTB Business Travel Solutions, Inc.

# JTB Group's Expense Data Linkage Platform "Bizvance JTB Dataconnect" Begins Integration with Shin Nihon Computer Management's "STAFee"

– Achieving Efficiency in Expense Settlement Operations, Including Travel Expense Settlement,  
Through Expense Data Linkage –

JTB Business Travel Solutions, Inc. (headquartered in Koto-ku, Tokyo; President & CEO: Masahiro Harada; hereinafter referred to as "JTB-CWT"), which provides the JTB Group's expense data linkage platform "Bizvance JTB Dataconnect," has commenced system-to-system data linkage with the business application "STAFee" provided by Shin Nihon Computer Management Co., Ltd. (headquartered in Shinjuku-ku, Tokyo; President & CEO: Atsushi Jinbo; hereinafter referred to as "SCM").

JTB-CWT, with its extensive experience and high level of expertise in the business travel management domain, offers comprehensive solutions that contribute to solving customer challenges and advancing business activities. "Bizvance JTB Dataconnect" is an expense data linkage platform that can link expense data such as business travel data and corporate card usage detail data to external systems.

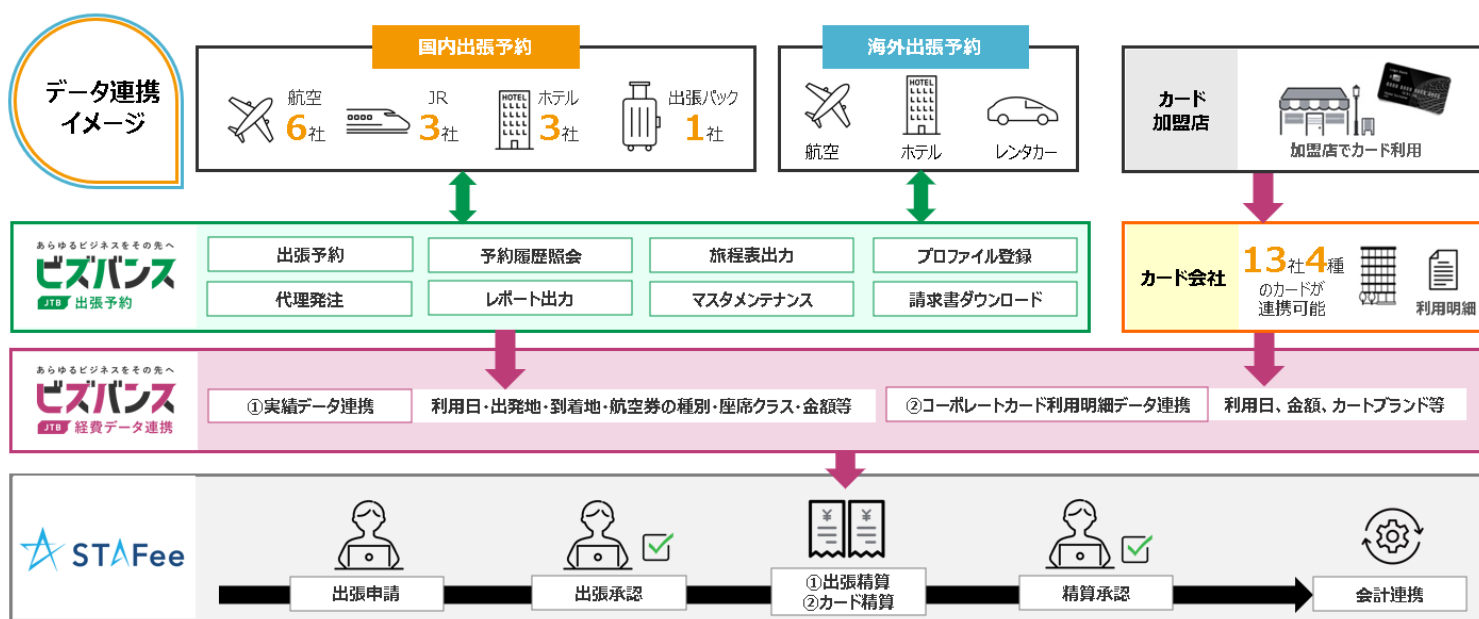

On the other hand, SCM utilizes cutting-edge technologies that are constantly evolving, including AI, to develop systems, construct networks, and provide information processing services. "STAFee" is a cloud-based business application that combines expense settlement and application system functions with general-purpose workflow

system functions. Both functions allow users to freely customize input screens, enabling operation in a unique format and available at a low cost.

### ■ Benefits of Integration

Through the linkage function of "Bizvance JTB Dataconnect," itinerary data for domestic and international business trips obtained via "Bizvance JTB Booking" will be automatically linked to "STAFee," eliminating the need for manual entry in conventional travel expense settlement.

Furthermore, consolidated invoices issued by "Bizvance JTB Booking" are invoice-compliant, eliminating the need to attach receipts and invoices, significantly streamlining travel expense settlement operations. The visualization of business travel details also facilitates business travel expense management, contributing to improved corporate productivity and strengthened governance. In addition, "Bizvance JTB Dataconnect"'s corporate card data linkage will now be integrated into "STAFee." Corporate card usage detail data from over 10 corporate card companies will be automatically imported, reducing manual entry and simplifying settlement processing. This also prevents data alteration and further streamlines expense settlement operations.

Moving forward, JTB-CWT and SCM will collaborate as alliance partners to provide more advanced business travel booking services and realize more efficient expense settlement operations.

### ■ About "Bizvance JTB Dataconnect"

"Bizvance JTB Dataconnect" is a cloud-based expense data linkage platform that relays business travel data and corporate card usage detail data necessary for expense settlement. As of August 2025, it has been implemented by over 300 companies. Its implementation contributes to the improvement of overall operational efficiency in expense processing by visualizing business travel and various usage expenses, preventing fraud, and reducing costs. "Bizvance JTB Dataconnect" aims to eliminate all manual entry tasks and the attachment of receipts and invoices. It has a proven track record of integration with many expense settlement systems and workflow systems sold in Japan.

#### ■ About "Bizvance JTB Booking"

"Bizvance JTB Booking" is a system that realizes centralized arrangement and unified management of business trips, streamlining and simplifying business-related operations. It is equipped with online booking for domestic and international flights/hotels for business travelers, as well as profile management, report extraction, and various settings/maintenance functions for administrators. It contributes to operational efficiency and cost reduction by enabling centralized booking of JR, flights, and tours for domestic business trips, as well as flights and hotels for international business trips.

#### ■ About "STAFee"

"STAFee" is a cloud-based business application that combines both expense settlement and application system functions with general-purpose workflow system functions, allowing users to freely customize screens and approval routes. It can digitize existing paper forms, and its standard features include functions for accounting personnel such as cost allocation and flexible journal entry. It also supports balance management for temporary payments and petty cash, broadly assisting expense settlement operations.
