JTB Business Travel Solutions, Inc.

JTB Group's Expense Data Connection Platform

"Bizvance JTB Dataconnect"

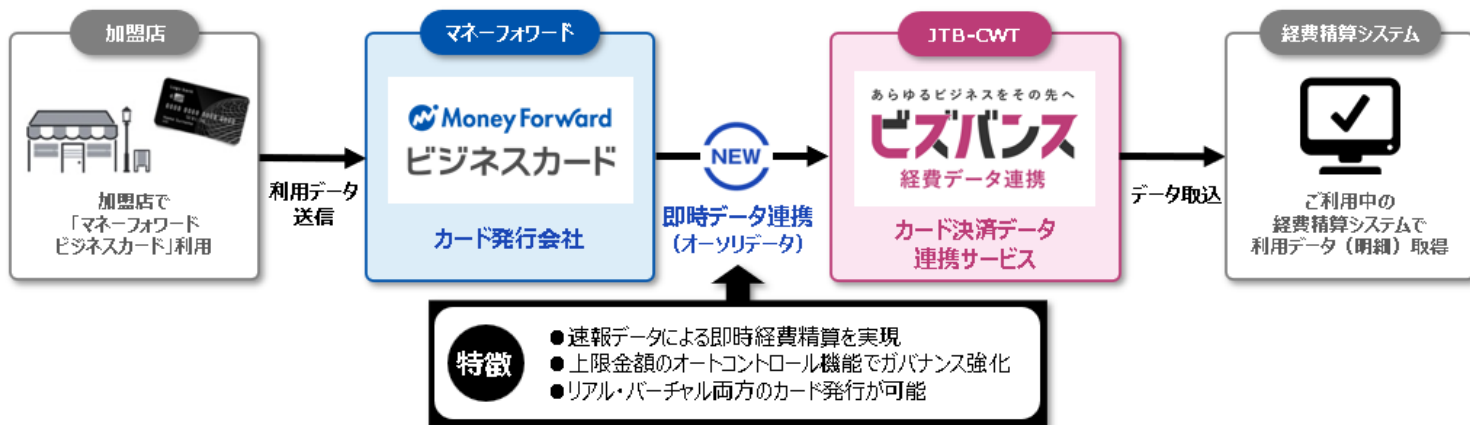

Begins Data Connection with "Money Forward Business Card"

JTB Business Travel Solutions, Inc. (headquartered in Koto-ku, Tokyo; President & CEO: Masahiro Harada; hereinafter referred to as "JTB-CWT"), which provides the JTB Group's expense data integration platform "Bizvance JTB Dataconnect," has commenced integration of payment data with "Money Forward Business Card" from Money Forward, Inc. (headquartered in Minato-ku, Tokyo; President & Group CEO: Yosuke Tsuji; hereinafter referred to as "Money Forward").

Through this integration, "Bizvance JTB Dataconnect," which already integrates business trip data, will now automatically import usage statement data from "Money Forward Business Card."

This eliminates the manual data entry that was previously required, significantly streamlining expense processing. Furthermore, by eliminating the risk of data falsification or alteration, it enhances the transparency and reliability of expense processing, contributing to stronger corporate compliance. This integration allows companies to maximize the benefits of "Money Forward Business Card" without being tied to a specific expense settlement system. Open data integration via "Bizvance JTB Dataconnect" dramatically improves the flexibility of expense management, allowing employees to focus on their core tasks, and greatly contributing to the overall productivity of the company.

[Service Features]

■ Comment from Mr. Yukihiro Koyama, Executive Officer, Money Forward, Inc., Executive Vice President, Money Forward Kessai, Inc.

"Money Forward Business Card" is used by many as a service that eliminates the need for employees to make advance payments and streamline complex expense settlement tasks. We are delighted that this integration with JTB Business Travel Solutions' "Bizvance JTB Dataconnect," which is partnered with various expense settlement systems, will allow us to provide even greater convenience with "Money Forward Business Card" and a smoother experience from payment to expense settlement. We will continue to collaborate to achieve even smoother expense settlement for both back-office and employees.

■ Comment from Mr. Koji Yoshino, Manager, Digital Innovation Promotion Office, JTB Business Travel Solutions, Inc.

Following the business trip data connection with "Money Forward Cloud Expense" in August 2024, this is the second collaboration with Money Forward, Inc., enabling data connection with "Money Forward Business Card." This initiative allows customers using "Bizvance JTB Dataconnect" in conjunction with their expense settlement system to experience the convenient settlement flow using the preliminary payment data (authorization data), which is a key feature of "Money Forward Business Card." We will continue to work with Money Forward, Inc. to achieve ideal expense settlement operations.

■ About "Bizvance JTB Dataconnect"

"Bizvance JTB Dataconnect" is a cloud-based expense data integration platform provided by JTB-CWT. As of February 2026, it has been implemented by over 300 companies. It can relay business trip arrangement data and card usage statement data necessary for expense settlement. Its introduction contributes to the overall efficiency of expense processing, such as preventing fraud through visualization of business trips and various usage expenses, and cost reduction. It has a proven track record of integration with many workflow and expense settlement systems sold in Japan.

■ About "Money Forward Business Card"

"Money Forward Business Card" is a business card that integrates with the back-office SaaS "Money Forward

Cloud" and enables speedy monthly closing and expense processing by acquiring transaction data in real-time. Both physical and virtual cards can be issued as many as needed and distributed to employees, streamlining expense settlement. It can also be used as a "purchasing card" for specific purposes. It offers "card control" functions that enable fraud detection and set usage limits, contributing to internal control.
